Software Developer, Divine Ai pvt.ltd || August-2021 Dec-2022, Bhubaneswar, Odisha

- Identified web-based user interactions and developed highly responsive user interface components via React concepts
- Established mentorship with interns in Front end development.
- Experience in developing UIs and React JS development environment.
- Experience in development, and deployment of APIs.
- Experience in debugging and performance improvement in React JS environment.

- Experience in developing and deploying database management systems.

React Developer, Nativebyte Software LLP||January-2023 Present, Delhi, Odisha

- API integration : As a frontend developer, you'll likely be responsible for integrating your application with APIs to fetch data and perform CRUD operations. You should be comfortable using tools like Axios and Fetch to make API calls.
- Redux: Redux is a popular state management library for React applications. As a React developer, you should have a solid understanding of Redux's core concepts, including actions, reducers, and the store.
- React Router: React Router is a powerful library that allows you to add routing to your React applications. As a React developer, you should be comfortable using React Router to handle client-side routing.
- Google map API: Implemented a real-time delivery tracking system using Google Maps API. Integrated geocoding for efficient pickup and drop-off location management. Enhanced user interface with interactive maps displaying assigned riders and delivery routes.
